

The diagram illustrates a cross-section of a road edge profile. Key features include:

- Top Layer:** A green hatched area representing grass or vegetation, with a width of 15 units.
- Edge Slope:** A 1% slope indicated by a dashed line.
- Layers:** A series of numbered layers (1-14) representing different materials or structures.
- Dimensions:**
 - 100 units for the width of the top layer.
 - 150 units for the width of the middle section.
 - 150 units for the width of the bottom section.
 - 15 units for the width of the bottom-most section.
 - 17.48 and 35 units for specific dimensions of the bottom-most section.
- Labels:**
 - "bierny kanał teletechniczny" (passive telecommunication channel) pointing to a specific layer.
 - "Granicz pas drogowy" (road edge boundary) at the top and bottom.
